 Shape..... **Pear**
 Cutting Style: **Modified Brilliant Cut**
 Transparency..... **Transparent**
 Color..... **Greenish Blue**

CONCLUSION

Species..... **TOURMALINE**
 Geographic Origin **NOT REQUESTED**

Comments:

This copper and manganese bearing tourmaline may be called "paraiba tourmaline" in the trade. The name "paraiba" comes from the Brazilian locality where this gem was first mined, however today it may come from several localities.

This color of tourmaline is commonly heated to improve or change the color. Whether or not this gemstone has been heated cannot currently be determined.

GIA REPORT 1156536389

This Report is not a guarantee, valuation or appraisal and contains only the characteristics of the article described herein after it has been graded, tested, examined and analyzed by the laboratory providing this Report ("GIA") and/or has been inscribed using the techniques and equipment used by GIA at the time of the examination and/or inscription. Inscriptions reported in this document are not a guarantee, validation, or warranty of an article's quality, country of origin or source; or that the article will be identifiable by the inscription in the future (since inscriptions can be removed). GIA makes no representation concerning any trademark, word, or symbol which is inscribed by GIA or which is identified on this Report. The recipient of this Report may wish to consult a credentialed jeweler or gemologist about the information contained herein.
